Reasons for and benefits of the Subscriptions

The Group is engaged in the manufacture and sale of production equipment and production lines for the manufacturing industries including semi-conductor, electronic and logistics industries. It is committed to innovation and diversification of its products and has invested significantly in the development of smart and automated production equipment and production lines.

The Group provides customers with one-stop solutions of research and development, design, production, sale and service for production equipment and production lines. Currently, the Group has successfully developed linear motor, DDR direct drive motor and vision systems. These technologies have been applied to the Group's existing high-speed high-precision solder paste screen printer machines, and can be applied to semi-

conductor equipment and other high-speed high-precision equipment. Meanwhile, the Group is optimistic about the development of the semi-conductor-related business, and has developed a semi-conductor wafer handling robot prototype with linear motor and DDR direct drive motor technology. At the same time, the Group has formulated plans to expand its semi-conductor related business and it has also hired an experienced professional team for its business expansion.

The Group has been focusing on the manufacturing of smart production lines and semi-conductor equipment, and also acts as distributor for foreign brands of automated machines. The Group expects there will be increasing demand for smart production lines, smart production equipment and semi-conductor equipment. Having considered (1) the technological developments in the domestic market compared to its foreign counterparts; (2) the large volume of semi-conductors being imported as compared to the significantly smaller volume of semi-conductors being exported; and (3) the recent policies launched by the PRC Government, including favourable industry policies, e.g. provision of tax benefits and subsidies, and the establishment of the National Integrated Circuit Industry Development Investment Fund with a total size of RMB120 billion focusing on the investment in chip design and the manufacturing and packaging of related equipment, the Company is optimistic about the future growth in the industry.

The Directors are of the view that the Subscriptions represent a valuable opportunity for the Group to bring in the Offeror as a solid strategic corporate investor. The Offeror, a wholly-owned subsidiary of Tsinghua Unigroup, has extensive experience, strong expertise and a wide business network in the integrated circuit industry in the PRC.

The Directors consider that the Subscriptions will bring about certain benefits including but not limited to the following:

- (a) The Group can finance the upgrade of its technology, products and production facilities as well as business expansion with proceeds to be received from the Subscriptions;
- (b) Tsinghua Unigroup, supported by Tsinghua University, has the technology and talent that may help the Group in upgrading its technology, products and production facilities; and
- (c) With Tsinghua Unigroup's existing business and future investments in the semi-conductor industry, the Group may be able to leverage its new controlling shareholder to further expand its smart production lines and semi-conductor equipment business in the PRC.
